

Round 1 results — Run Tetralogie1Fr submitted from IRIT\_L SIS\_FR

Run Description

Tetralogie1fr uses our Tetralogie System which was initially designed to mine textual documents such as scientific publications and patents. Here we focus on <text> parts and consider phrases. Each topic is represented by a term set and at least one should occur in the document for it to be retrieved. The document ranking is based on the term frequency and the number of the topic terms in the document.
