## Run Description

This run submission combines a BM25 baseline with a logistic regression based reranker trained on tfidf-features in combination with relevance judgments of the first round. The baseline run is retrieved with the default ranker of Elasticsearch/Lucene (BM25) and queries using the contents of the <query>, <question>, and <narrative> tags. Documents are reranked for those topics where relevance judgments are available (1-30), otherwise the baseline ranking remains unaltered (31-35).
