Round 5 results — Run fc3-qrel-hidden submitted from fcavalier

Run Description

Find docids not in the round 1-4 judgment file that have titles, authors, and/or s2_id which match previously judged documents under different docids. Result is 172 rows per topic on average. (There are fewer than 1000 rows on purpose.) The topics 46-50 are new for round 5, and since there are no published previous judgments, the submission has just one dummy result each for them, per the requirements.
